# Install Wallet

Metamask (recommended)

If you don't already have a ETH wallet, install Metamask from https://metamask.io/. Alternatively, the Brave browser comes with a wallet built in (see Brave below).

METAMASK

New to MetaMask?

No, I already have a Secret Recovery Phrase Import your existing wallet using a Secret Recovery Phrase **Import wallet**	**Yes, let's get set up!** This will create a new wallet and Secret Recovery Phrase **Create a Wallet**

Very important, your recovery phrase and password are ONLY known to you, and cannot be retrieved if you lose them. Find a secure place to store them - we recommend BitWarden as a general password and note store.

You should now have a browser extension for Metamask, which also gives you a wallet address. This is your "name" in crypto land - it's how everything else will identify you as you!

METAMASK   ● Ethereum Mainnet ∨

Account 1

Refresh list or import tokens

Need help? Contact MetaMask Support
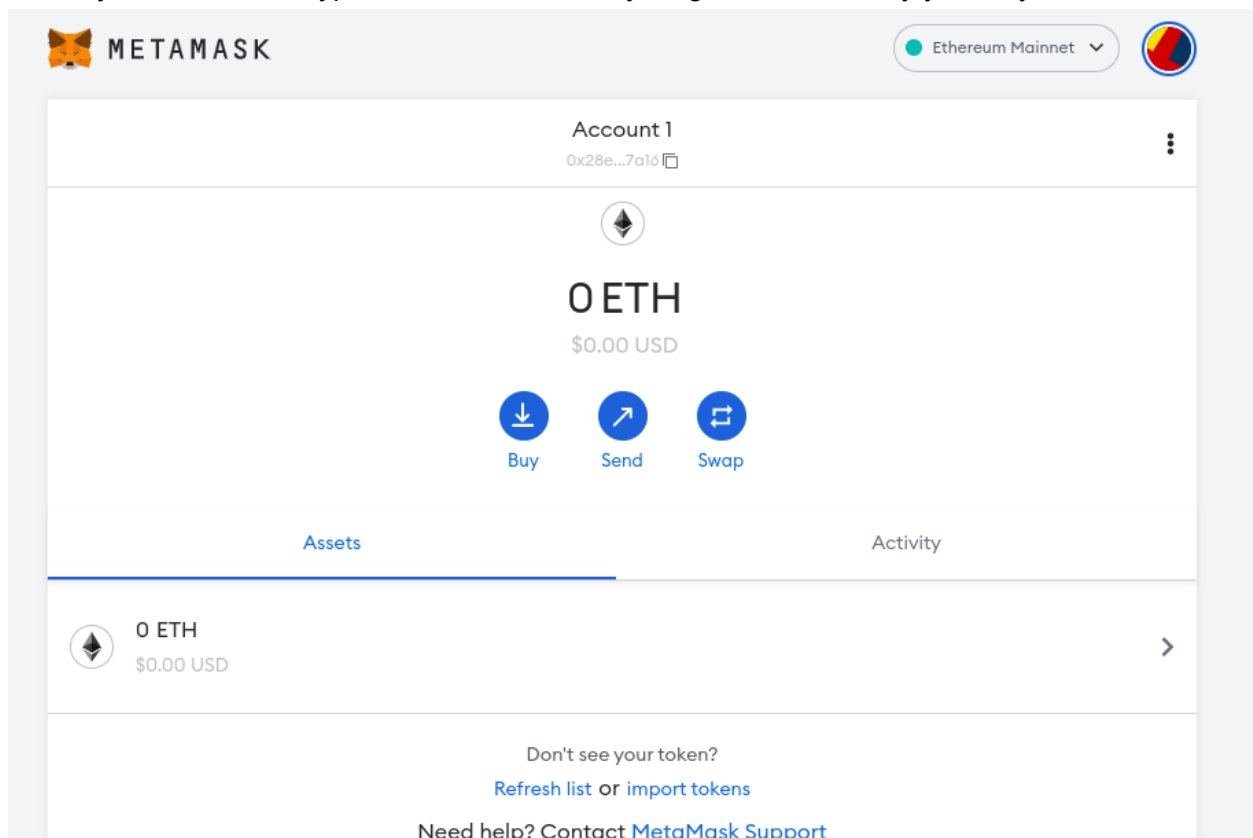

Using the Brave Browser (alternative)

Click on the Wallet icon on the top right.
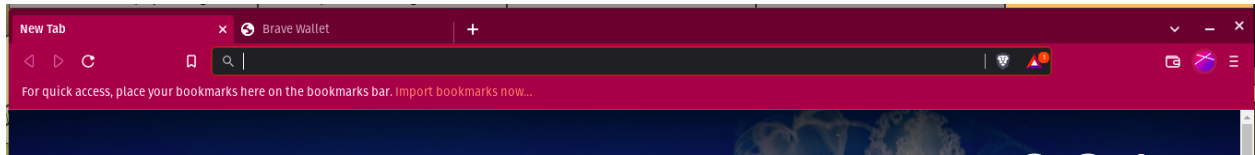

Set a password, click **Continue**

Click **Continue**

Write down your phrase or copy somewhere safe (**again, you cannot lose this phrase!!!!**)
Click box, Click **Continue**

Repeat the phrase to demonstrate you got it, click **Continue**

Your wallet is now setup.

When switching below, you will click on Metamask, even though you're using the Brave wallet. Brave will automatically act like Metamask.

Switch to the Polygon network

By default Metamask and other wallets will by default use the Ethereum Mainnet.

However MoP uses the Polygon network, which lets us process transactions, votes, and the like at 1/1000th the cost of Ethereum. Since we want to get money out of capitalists hands, it's worth the small setup you'll need here!

The easiest way to switch is to open your browser to https://wallet.polygon.technology/, and let them do the switch for you.

Click on **Connect to Wallet**

Getting started with Polygon PoS chain

The safe, fast, and most secure way to use Polygon PoS.

Polygon Wallet

Send and receive crypto assets on Polygon network

Polygon Bridge

Deposit and withdraw between networks

Polygon Staking

Stake MATIC to earn rewards

Widget Dashboard

Manage all your Polygon wallet widgets at one place

We use cookies to improve your experience on our application. Please read our privacy policy for more information.   **Accept**   Deny

Click on **Metamask**

Login

Metamask
Connect using browser wallet

Coinbase Wallet
Connect using Coinbase wallet

Bitski Wallet
Connect using Bitski wallet

Venly
Connect using Venly wallet

Metamask will pop up to ask if you want to allow this. Click **Next**.

Next

Click **Connect**

< Back

https://wallet.polygon.technology

Connect to Account 1 (0x28e...7a16)

Allow this site to:

See address, account balance, activity and suggest transactions to approve

Cancel

Connect

Click **Sign**

Go to https://wallet.polygon.technology/wallet
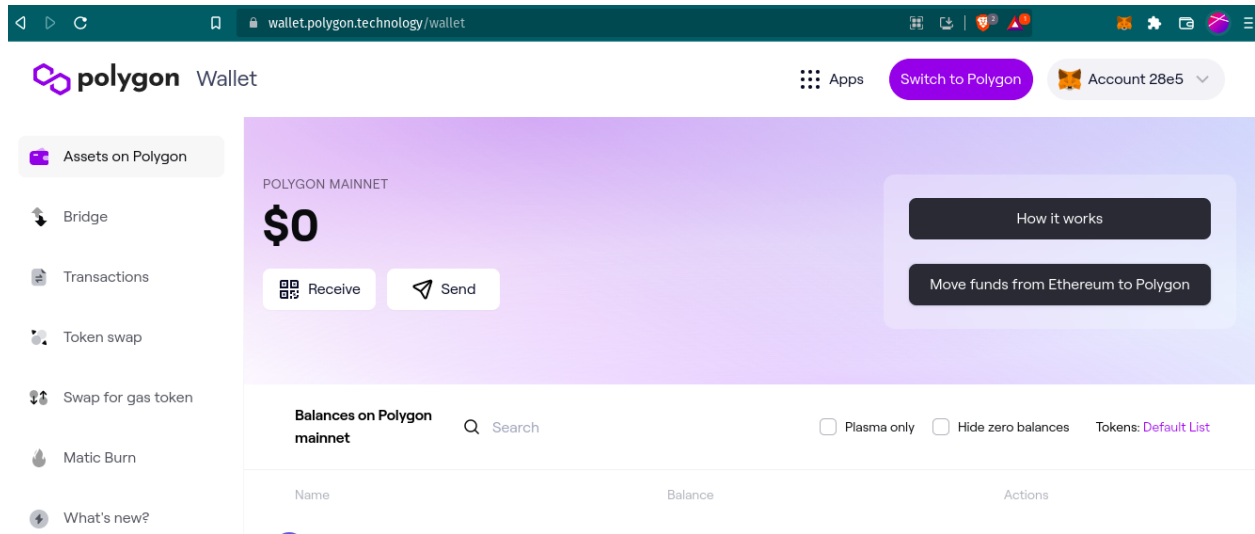

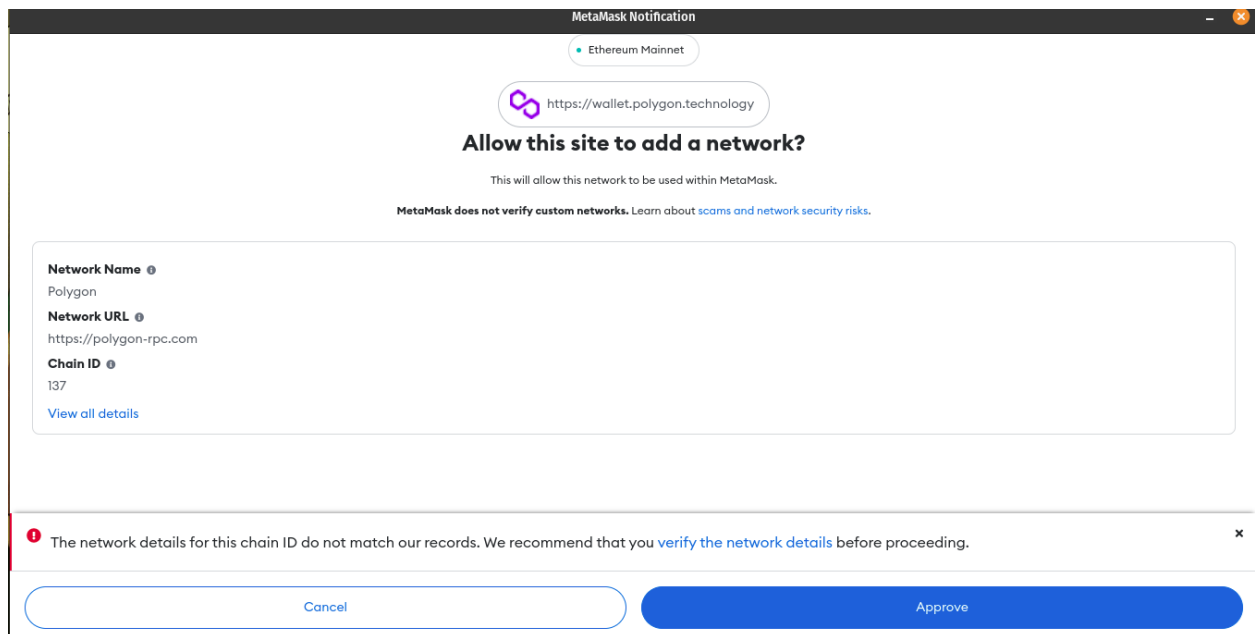

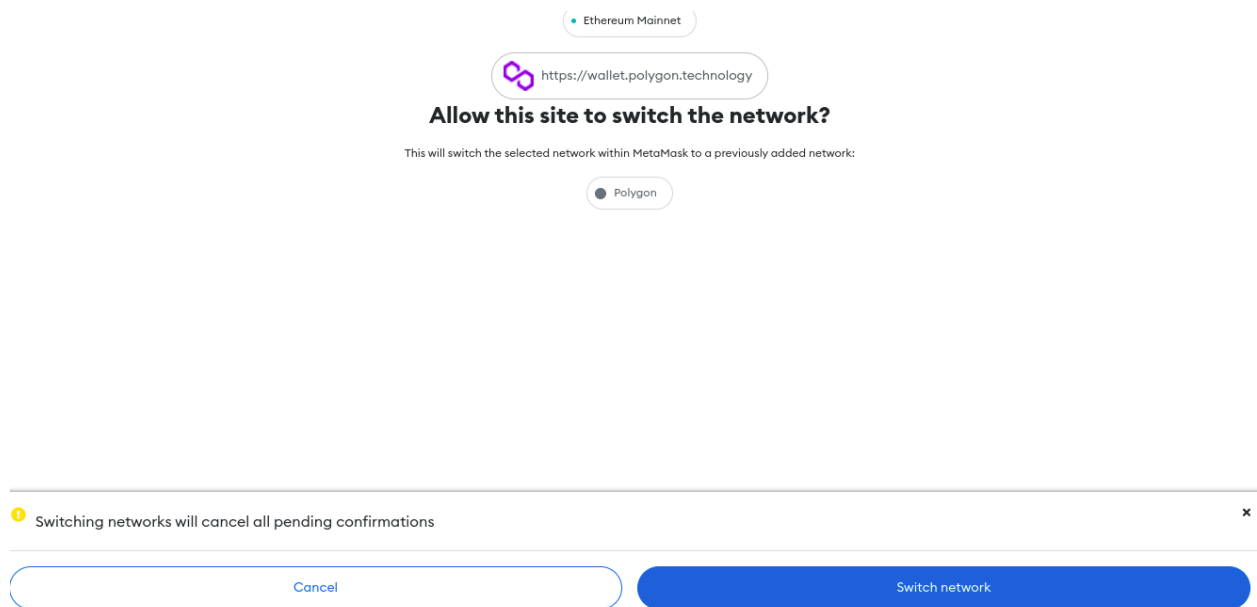

Click on **Switch to Polygon**

Metamask will pop up confirmation. Click **Approve**.

Click on **Switch Network**

Ethereum Mainnet

https://wallet.polygon.technology

Allow this site to switch the network?

This will switch the selected network within MetaMask to a previously added network:

Polygon

⚠ Switching networks will cancel all pending confirmations   ✕

Cancel   Switch network

Open the metamask extension. The drop down on the right should say "Polygon".

You're now on the Polygon network with a wallet!

Join the DAO

Now that you have a wallet, you can add the MoP membership token and others to your wallet so it displays.

Membership Token

Open Metamask
Ensure the Assets/Activity selector is on **Assets**
Scroll to the bottom, and click on **Import Tokens**
In the **Token Address** field, paste 0xB47D9011Bf2171FCb3108d4D6944AF60b204F5CD
The Token Symbol field should autoupdate to read "MOP"

Get the token

Join our discord at https://discord.gg/zRbncdgw, and introduce yourself, including pasting your wallet address (copy symbol under Account 1 in metamask). We can then hold a vote to issue you a MOP token, and possibly some MATIC as well!
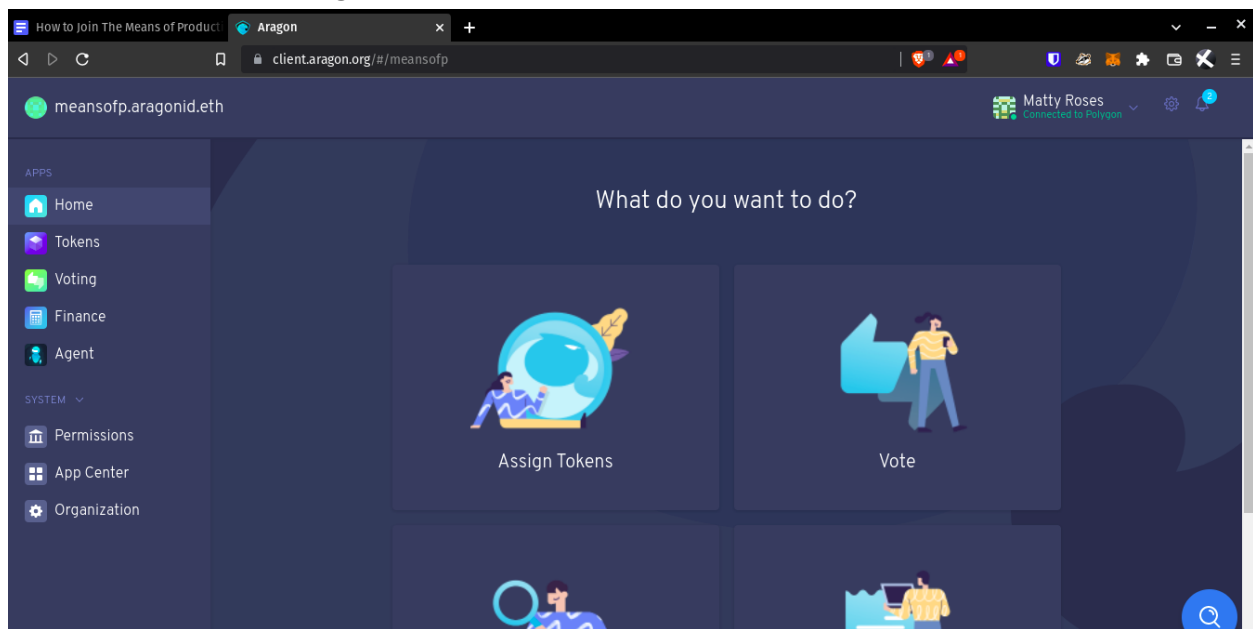

Using the DAO

Open the DAO

- Ensure your Wallet is on the Polygon network
- Navigate to https://client.aragon.org/#/meansofp . You can also go to https://client.aragon.org/#/ and click on **Open an Existing DAO**

Voting

On the left, click on **Voting**

Voting will require a slight amount of MATIC. Metamask will by default use a low amount of gas, but this will fail on the Polygon network. You can however increase the amount of gas - because Polygon is so much cheaper than ETH, it is still a much better option.

To increase

Example

Create transaction

PERMISSION NOTE

You cannot directly perform this action. You do not have the necessary permissions.

Action Requirement

You can perform this action through:

○ **Tokens**
Execute desired action as a token holder

ACTION TO BE TRIGGERED

This transaction will eventually perform

Create a new vote about "Create labor based token"

on Voting.

Create transaction
